

INCOMES

Our incomes would come, of course, from the different selling of our varied products to the different funeral homes, depending on the size of the plant the price is different, being our most expensive product, a tree in our forest made from trees that represent graves, making it a unique forest where every tree was once a person. This would be a tourist place to visit and admire and other part of our incomes would come from the entrance to our special forest, having the chance, also, to allow some food companies to make a restaurant near the entrance, having even more incomes coming.
