

KEY RESOURCES

Our product does not require as much as other projects would need to be completed, indeed, all We need would be the possibility of export and import our different types of seeds and products and the buying of those products by the funeral homes and natural parks. We could create a future visited tourist place by only using our special trees to create the most beautiful graveyard ever seen. It's also very important the possession of an amount of terrain where plant the big scales of the product (types of trees).
