

MEDIA

Our idea is to have a web dedicated to the product, and to promote the page We had the idea of making a little announcement in some newspaper or magazines, We would also make little announcements in cards near places like the Church or environmental facilities. Also We would present the idea the to environmental groups, because our project would be a benefit for them, so We would ask for a way of making our name to be heard by more people.

If You make a special subscription to our web page You'll be able to have Your beloved one as one of our majestic and imponent trees in what We call "The green graveyard", a forest that also is a memorial for many people.
